

GLOBAL FORUM OCCUPATIONAL CANCER IN FIREFIGHTERS

The Global Forum on Occupational Cancer in Firefighters – and other important health and safety matters that affect firefighters – will be held in Melbourne, Australia, on March 14-15 2013.

This is a unique opportunity for all who are interested in advancing the cause of just and fair compensation for injured firefighters around the globe.

International and local speakers include scientists, epidemiologist, firefighting experts, Chief Fire Officers, senior operational personnel, health and safety experts, and Australian MPs.

A highlight will be the presentation by Dr Tee L. Guidotti MD, MPH, FACOEM, FACP, an internationally recognised epidemiologist and icon in the world of occupational and environmental medicine.

This is a first for Australia. Please secure your attendance at this international event, which is being facilitated by the United Firefighters Union of Australia, in conjunction with the United Firefighters of Winnipeg and the Edmonton Firefighters Union.

Don't miss it! Register today.
