

BULLETIN

Bulletin No: 012

22 November 2022

TO ALL UFUA MEMBERS

National Committee of Management Conference Highlights On Website

An edited Highlights Reel from footage taken during the recent NCOM meeting in Canberra has been posted on the National UFUA website for viewing. Please share this link of the video with your friends, family and colleagues:

<https://www.ufua.asn.au/ufua-national-conference-2022/>

You will see that the NCOM meeting addressed a wide range of matters. We will be progressively uploading video links of specific subject matter to the National website. As reported in the previous National Bulletin (#011), there are already two videos concerning threats to firefighter presumptive cancer laws. We expect that the next video to be uploaded will concern the PFAS Firefighter Blood Study, and will include valuable commentary from Professor Mark Taylor of Macquarie University.

Please share this content widely so we can continue to get information about firefighter concerns out into the public sphere.

Authorised by National Secretary Greg McConville
